## Amendments to the Claims Listing of Claims

The following Listing of Claims replaces all prior versions and listings of claims in the application.

## 1-21. (withdrawn)

- 22. (currently amended) A composition comprising a plurality of solid amorphous dispersion particles comprising a substantially amorphous drug and a polymer selected from the group consisting of hydroxypropyl methyl cellulose acetate succinate, hydroxypropyl methyl cellulose phthalate, cellulose acetate trimellitate, polyvinyl alcohols that have at leaset a portion of their repeat units in hydrolyzed form, polyvinyl pyrrolidone, poloxamers, and blends thereof wherein said particles have an average diameter of at least 40 μm and a bulk specific volume of less than 5 mL/g, and wherein at least 80 vol % of said particles have diameters of greater than 10 μm and wherein said particles are formed by a spray drying process, said process comprising the steps
  - (a) forming a feed solution comprising said drug, said polymer, and a solvent in which both said drug and said polymer are soluble;
  - (b) directing said feed solution to a spray-drying apparatus;
  - (c) atomizing said feed solution into droplets in said spray-drying apparatus;and
  - (d) contacting said droplets with a drying gas to form said particles.
- 23. (original) The composition of claim 22 wherein at least 90 vol % of said particles have diameters of greater than 10  $\mu$ m.
- 24. (original) The composition of claim 22 wherein said particles have an average diameter of at least 50  $\mu$ m.
- 25. (original) The composition of claim 22 wherein said particles have a bulk specific volume of less than 4 mL/g.

26. (presiously presented) The composition of claim 22 wherein said drug is selected from the group consisting of antihypertensives, antianxiety agents, anticlotting agents, anticonvulsants, blood glucose-lowering agents, decongestants, antihistamines, antitussives, antineoplastics, beta blockers, anti-inflammatories, antipsychotic agents, cognitive enhancers, anti-atherosclerotic agents, cholesterol-reducing agents, antiobesity agents, autoimmune disorder agents, anti-impotence agents, antibacterial and antifungal agents, hypnotic agents, anti-Parkinsonism agents, anti-Alzheimer's disease agents, antibiotics, anti-depressants, antiviral agents, glycogen phosphorylase inhibitors, and cholesteryl ester transfer protein inhibitors.

27-29 (Cancelled)

30. (Previously presented) The composition of claim 22 wherein said polymer is hydroxypropyl methyl cellulose acetate succinate.

31-33 (cancelled)

- 34. (Previously presented) The composition of claim 22 wherein said polymer is present in an amount sufficient such that said solid amorphous dispersion, following administration to an *in vivo* or *in vitro* use environment, provides concentration enhancement of said drug in said use environment relative to a control composition consisting essentially of an equivalent amount of said drug alone.
- 35. (Previously presented) The composition of claim 34 wherein said composition provides a maximum drug concentration of said drug in said use environment that is at least about 1.25-fold that provided by said control composition.
- 36. (Previously presented) The composition of claim 34 wherein said composition provides in said use environment an area under the drug concentration versus time curve for any 90-minute period from the time of introduction to about 270 minutes following introduction to said

use environment that is at least 1.25-fold that provided by said control composition.

- 37. (Previously presented) The composition of claim 34 wherein said composition provides a relative bioavailability of said drug that is at least 1.25-fold that of said control composition.
- 38. (cancelled)
- 39. (Previously presented) The composition of claim 22 wherein said droplets have an average diameter of at least 50  $\mu$ m and a D<sub>10</sub> of at least 10  $\mu$ m.
- 40. (Previously presented) The composition of claim 22 wherein said droplets have a  $D_{90}$  of less than about 300  $\mu$ m.
- 41. (Previously presented) The composition of claim 22 wherein said droplets have a  $D_{90}$  of less than about 250  $\mu m$ .
- 42. (Previously presented) The composition of claim 22 wherein said droplets have a Span of less than about 3.
- 43. (Previously presented) The composition of claim 22 wherein said droplets have a Span of less than about 2.
